

**Freedom of Information Request: 0177 2019/20**

**We would like to request your Trust's figures in terms of number of shunts (CSF diversion) which may be ventricular peritoneal shunt, lumboperitoneal shunt, or any other form of CSF diversion in addition in addition to the number of venous sinus stents performed for the diagnosis of idiopathic intracranial hypertension in 2018.**

Code	Procedure	No	Of which had Idiopathic Intracranial Hypertension
A534	Creation of lumboperitoneal shunt	26	9
A125	Creation of subcutaneous cerebrospinal fluid reservoir	10	0
A532	Creation of thecoperitoneal shunt	1	0
A124	Creation of ventriculoperitoneal shunt	105	12
A123	Creation of ventriculopleural shunt	1	0
A122	Creation of ventriculovascular shunt	2	0

Procedures searched for are:

Code	Procedure
A121	Ventriculocisternostomy
A122	Creation of ventriculovascular shunt
A123	Creation of ventriculopleural shunt
A124	Creation of ventriculoperitoneal shunt
A125	Creation of subcutaneous cerebrospinal fluid reservoir
A531	Cerebrospinal syringostomy
A532	Creation of thecoperitoneal shunt
A533	Creation of syringoperitoneal shunt
A534	Creation of lumboperitoneal shunt
A536	Creation of lumbar subcutaneous shunt
