Freedom of Information Request: 0784

University Hospitals Birmingham NHS Foundation Trust (UHB) completed a merger by acquisition of Heart of England NHS Foundation Trust (HEFT) on 1st April 2018. Due to historical differences in data collection/reporting across UHB and the former Heart of England NHS Foundation Trust this response has been provided by hospital site.

Queen Elizabeth Hospital Birmingham

There are two types of skin cancer MDTs; Local Skin MDTs and Specialist skin cancer multidisciplinary teams (SSMDT).

Specialist Skin MDTs will normally consider patients who:

- **have a rare skin cancer.**
- **have SCC or melanoma that's at higher risk of coming back or has come back.**
- **have any type of skin cancer that's spread to another part of the body.**
- **need treatment that the Local Hospital Skin Cancer MDT doesn't provide.**
- **may be offered to participate in a clinical trial.**

If your Trust hosts a Specialist Skin MDT, we would be very grateful for the names of the MDT participants please.
