
Consultant Percutaneous Coronary Intervention (PCI) Operator Report

Consultant Name: Kaeng Lee

GMC Number: 4091242

Hospitals at which PCI was Performed:

Hospital	Count
Birmingham Heartlands Hospital	227

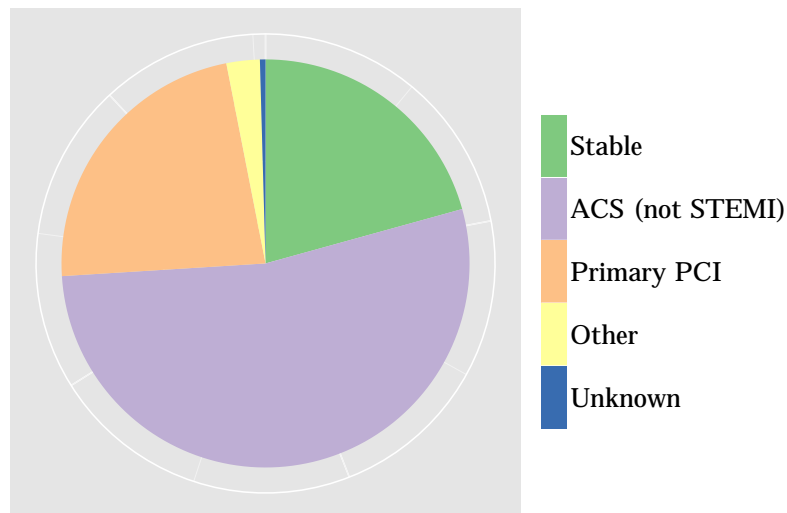

Data from 1st January 2012 to 31st December 2012 inclusive.

Extent of Missing Data in Variables Relevant to MACCE Risk Estimation:

	Age	Sex	Medical History	Shock	Urgency	Vessels Attempted
Count	0	0	2	6	0	14
Percent	0	0	0.88	2.64	0	6.17

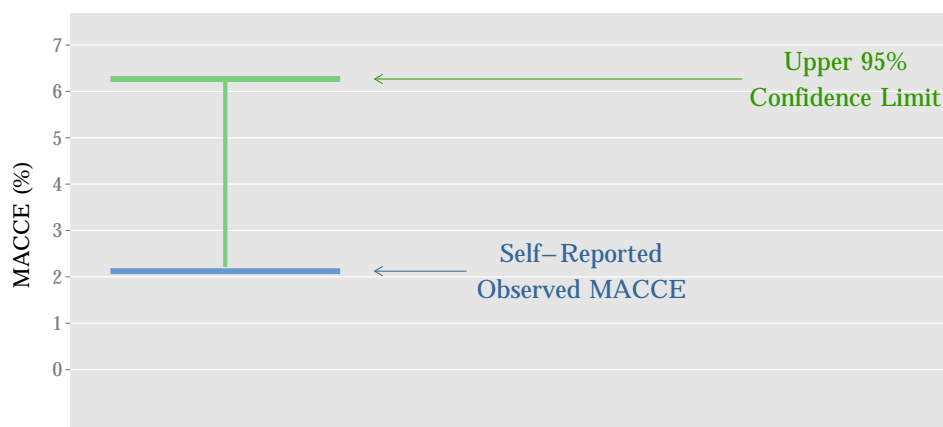

Total Number of PCI Procedures: 227

Number of Procedures Split by Clinical Syndrome:

Indication	Count
Stable	47
ACS (not STEMI)	121
Primary PCI	52
Other	6
Unknown	1

Major Adverse Cardiac and Cerebrovascular Event (MACCE) Rate:

	Rate Per 100 Procedures
Self-Reported Observed MACCE	2.20
Upper 95% Confidence Limit	6.27

These data may include procedures on persons who underwent multiple interventions during a single episode of care. The allocation of MACCE to consultants within a multi-procedure episode of care may change in future analyses.
