## About the kind of accident

Kind of accident	Slip, trip, fall same level
Work process involved	Service or assistance to the public
Main factor involved	Slip, stumble or fall
	IP went to staff toilet and slipped, banged hand on

What happened

bin whilst falling. Sustained a dislocated shoulder, taken to A&E where it was put back in place, it popped out again, shoulder required surgery. IP suffers with dislocations to her shoulder and can usually put it back in herself. Cleaning had just taken place in the toilet and there as a warning cone out side the area. Domestic supervisor visited ward 10minutes after incident took place to see whether the cleaning contributed to the fall, domestic supervisor stated that floor was not excessively wet and the mop was not excessively wet and that it was practically dry. IP will be unable to work for more than 7 days

### About the kind of accident

Kind of accident	Lifting and handling injuries
Work process involved	Service or assistance to the public
Main factor involved	Pushing, pulling
	IP has reported that she hurt her back pushing a fridge back in to place on the ward. The fridge had been pulled out as part of a cleaning audit and left out as cleaning was required. IP had to push the

**What happened**

fridge back in to place, this was a normal weekly task IP performed as part of duties. IP has reported that she felt something in her back at the time but did not report this at time of incident. IP has only recently said that this was a work related issue after visiting OHD. . The OHD reports that IP had never suffered with back problems before this event. Managewr has looked back through IP sickness and can see a number of times when IP has called in with a bad back. the most recent was in May 2015 after falling off a stool at home and hurting her back. As IP has stated that the injury was work related Riddor is being completed. There is no other evidence to suggest that it was.
