Where did the incident happen

The incident happened at the above address

About the incident

Incident Date	06/06/2016	Incident Time	13:12
In which local authority did the incident occur (Country, Geographical Area and Local Authority)?			
England, West Midlands, Birmingham			
In which department or where on the premises did the incident happen?			
Main Theatres			
What type of work was being carried out (generally the main business activity of the site)?			
Government administrative functions, Education, Health - Human health activities - Hospital activities			

The enforcing authority for the address where the incident happened is HSE

About the kind of accident

Kind of accident	Slip, trip, fall same level
Work process involved	Cleaning - Industrial or manual
Main factor involved	Slip, stumble or fall
What happened	The cleaner was cleaning the corridor IP advised that they felt the floor was soaking wet, only two signs in the corridor one being at the top and bottom end of the corridor notifying people that the floor is wet. As IP was walking out of the department by the reception IP slipped and fell on her back. IP felt pain in back and shoulder. IP rested before continuing with work duties. On the way back into theatre IP witnessed another member of staff fall. IP off work from 7th June until 20th June. Incident has been investigated by G4S housekeeping manager, equipment replaced and training refreshed. There were plenty of cones in

situ.

The enforcing authority for the address where the incident happened is HSE

About the kind of accident

Kind of accident	Lifting and handling injuries
Work process involved	Service or assistance to the public
Main factor involved	Putting down, bending down
	On the 19/08/15 09.12 AM pt was seen in SR1, physio treatment in progress with a borderline bariatric pt, when pt. did not follow instructions, he let go of the gutter frame with one hand to sit down with out checking that the band 5 was behind him that the wheel chair was close to him and in a safe place for him to safely sit down, the band 5 was not behind the pt, some distance away from the pt, not directly behind the pt, causing the pt. to almost miss the seat, only being half on the egde of the wheel chair, the weight and momentum took IP with the pt as IP was supporting the pt at the time,

What happened

IP was jared forward with force with the pt, being crushed in between the pt gutter frame which the pt. was still holding with one hand and the solid plastic end of the bed.

Incident reported over a year after it happened. H&S team have requested further information from IP managers to understand why it was not reported at the time and what investigation took place following the incident. Manual handling advisor has reviewed IP, report has been requested.

IP did not lose any time from work following the incident but did have an MRI and has a fractured in her hip, a deep label tear? and something else which IP was not sure about. IP is awaiting review by orthopaedic consultant. IP has been reviewed by occupational and health team recently.

About the kind of accident

Kind of accident	Fall from height	Height of fall (in metres)	1
Work process involved	Other process not listed above		
Main factor involved	Slip, stumble or fall		
What happened	I WAS WALKING DOWN THE STAIRS AND I SLIPPED AND MISSED TWO STEPS. AS I WENT TO FALL I BRACED MYSELF ON THE RAILINGS. I FELL TO THE MIDDLE LANDING- LANDING ON MY RIGHT ARM. I INFORMED MY LINE MANAGER OF THE INCIDENT. I FELT FINE AND WENT TO THE TEAROOM TO SIT FOR A WHILE. THE PAIN THEN INTENSIFIED AND MY WRIST STARTED TO SWELL. I BELIEVE THE FALL WAS DUE TO NO TREAD ON MY SHOES AND NOT CONCENTRATING ON THE STAIRS.
